PROFESSIONAL SUMMARY

A problem-solver at heart, passionate about using advanced technology like quantum computing, data-driven optimization, AI/ML and financial engineering to tackle the toughest challenges. My focus is on turning complex theories into practical and reliable solutions, with a proven ability to design, simulate, and deploy analytical pipelines that drive strategic data-led decisions. Passionately curious, I am driven to expand my expertise and create meaningful impact within the people and organizations I work with.

PROFESSIONAL & WORK EXPERIENCE

02/2026 – Present
Hong Kong

NVIDIA Student Ambassador

- Architecting a multi-agent AI fraud assistant for SME lending, orchestrating specialized agents (Retrieval, Fraud Detection, Compliance) with LangChain and NVIDIA NIM to autonomously analyze streaming HKMA-IADS data and eliminate manual rule updates.
- Engineering a GPU-accelerated detection pipeline using RAPIDS (cuDF, cuML, cuGraph) and GNN-XGBoost ensemble on Triton Inference Server, identifying account farms and money mule networks.
- Hardened for production with real-time Apache Kafka/Morpheus streaming, SHAP explainability for regulatory audit, and NeMo Guardrails enforcing PII redaction alongside quantum security.

06/2025 – 08/2025
South Africa

Guns and Rain Data and AI Specialist (Internship)

- Migrated and standardized data across 2 database systems, establishing data quality frameworks and improving accessibility for 15+ stakeholders; reduced data retrieval time by 40%
- Designed and deployed a production LLM-powered analysis tool to parse unstructured newsletter and social media data, identifying emerging market trends and delivering automated insights.
- Facilitated weekly client communications to present AI-driven insights, translating technical findings into actionable business recommendations or non-technical stakeholders

06/2024 – 08/2024
South Africa

Just Grace NPC Data Scientist (Internship)

- Designed and delivered comprehensive Data Management and Power BI training program for 20+ organizational leaders.
- Integrated data solutions with cloud technologies to enhance accessibility and collaboration.
- Developed and delivered firm-wide training on Business Intelligence dashboards (Power BI), enabling senior management to monitor Key Risk Indicators (KRIs) and performance metrics in real-time.

06/2024 – 08/2024
Buon Ma Thuot,
Vietnam

Suca Foods Website Developer

- Led the development of company websites, enhancing user experience and functionality to effectively showcase products and services

PROJECTS

Quantum Error Correction using LLMs AI, Python, Quantum Computing, Algorithms

- Designed and implemented a hybrid meta-optimization system integrating Large Language Models (LLMs) with numerical solvers (Dual Annealing, TURBO) to dynamically adjust Minimum Weight Perfect Matching (MWPM) edge weights, achieving a 2-5% logical error rate reduction on Google Sycamore and simulated surface code data.

- Developed modular, versioned prompt engineering and stratified fail-case sampling to translate quantum syndrome patterns into actionable weight adjustments. Integrated Chain-of-Thought (CoT) reasoning and Automated Scientific Minimization of Regret (ASMR) to enable self-tuning hyperparameter optimization for BPOSD decoders.

SnP 500 Prediction and Volatility Trading Using ML Monte Carlo Methods, ML, LSTMs, Python

- Developed an ML system to forecast market movements by engineering financial features and evaluating ensemble models and LSTMs.
- Focused on risk-adjusted performance metrics and strategic backtesting to validate prediction

AI-Powered Health and Wellness Assistant Python, SQLite, RAGs, LLMs, Flask, Hugging Face, Open CV, CNN

- Engineered and deployed a full-stack Gen AI application using Flask, Hugging Face Transformers, and RAG pipelines. The system processes both structured queries and unstructured image data (via CNN) to provide quality responses.
- Translated complex computer vision outputs (95% accuracy) into actionable, plain-language dietary insights, demonstrating the ability to bridge the gap between technical models and business/user objectives.

CERTIFICATIONS

AWS Generative AI Practitioner and AWS AI Cloud Practitioner 2026	NVIDIA Deep Learning Institute - Building Transformer-Based Natural Language Processing Applications 2026	NVIDIA Deep Learning Institute - Building LLM Applications with Prompt Engineering 2026
AIESEC Global Volunteering in Vietnam 2024	Udemy Certification for JavaScript - The Complete Guide 2024 (Beginner + Advanced)	Udemy Certification Complete Ethical Hacking Bootcamp
ESG Certification - Upskilling for a Greener Future Project - Green Skills Labs 2024	IELTS band score of 8 out of 9 (Academic Module) 2022	

EDUCATION

09/2023 – 12/2026 Hong Kong	BSc Data and Systems Engineering (Advanced Std I) City University of Hong Kong • cGPA: 3.24/4.3 (Last Sem: 3.5) • Relevant coursework: AI/ML, Financial Engineering and Analytics, System Modelling and Simulation, Decision Analytics and Risk Management, Data Intensive Computing.
07/2025 – 11/2025 Auckland, New Zealand	Exchange Programme University of Auckland • Relevant course work: Cybersecurity and Artificial Intelligence
09/2022 – 06/2023 Hong Kong	BSc with Honors in Computer Science Hong Kong Metropolitan University • cGPA: 3.88/4 • Dean's list holder: Python Programming, HTML and CSS, Introduction to IT

LEADERSHIP/OTHER ACHIEVEMENTS

10/2025 – Present Hong Kong	Participant, HKSTP Talent Foundry Starter • Participating in a 100+ hour intensive bootcamp featuring components powered by HKSTP's ecosystem partners and giants like NVIDIA, AWS, and Deloitte. • Applying technical knowledge to real-world business scenarios under the guidance of industry experts. • Nominated as a speaker by the Talent Foundry in a bonfire chat at the HKSTP career fair.
09/2023 – 06/2025 Hong Kong	Local Committee Vice President, AIESEC in CityU • Leader of a 7-member team in the Outgoing Global Volunteer department to promote global volunteering. • Developed and executed a highly successful promotional campaign at CityU to raise awareness and encourage participation in exchange volunteering programs (14 people on exchange)

11/2023 – 01/2024
Hong Kong

Merit Award, HK Techathon+ 2024

- Developed an innovative supplementary device for wheelchairs that incorporates autonomous stair-climbing capabilities. Implemented advanced sensor technology to harness generated electricity serving as an auxiliary power source for enhanced battery backup.
